ABOUT US

RDS Group of Companies is a third generation civil construction company, specialising in residential, commercial, industrial and infrastructure development.

RDS has a notable 50 year history of continued growth with the civil construction industry, delivering high quality, multi-disciplinary services, on time and within budget.

RESOURCES

At RDS we are confident in our ability to successfully deliver projects in the current market, based on our capacity to access a large pool of re-sources within RDS and our trusted suppliers and subcontractors.

Our team encompasses a wide range of personnel including supervisors, engineers, in house surveyors, machine operators, fencers and ground support staff.

Our supervisors are leaders in their field and highly skilled in all areas of civil construction.

We also have our own fleet of machinery operated by highly trained operators, including extensive GPS knowledge.

RDS resources are all encompassing and have the ability to work with in the greater South East Queensland area.

SPECIALIST AREAS:

- **Subdivisional works**
- **Townhouse Subdivisions**
- **Car park construction**
- **Bio retention basin construction**
- **Major service installation**
- **Rectification works**
- **Bridge construction**

SURVEY TEAM

RDS has an in house team of qualified surveyors and survey assistants working under Queensland Surveying and Engineering Services (QSES). Our surveying team has vast knowledge and experience in all areas of the civil space and are able to assist our projects team with precise quantities in both tender submission and monthly progress claims.

QSES uses current modelling programs such as Terra model and LisCAD as well as implementing a modern array of GPS and conventional survey practices utilising Trimble survey equipment, Topcon machine control as well as our own site bases.
